

## Historical abortion statistics, Ohio (USA)

compiled by Wm. Robert Johnston  
last updated 23 November 2023

Definition of table data (see notes after table for additional information):

- *Live births* includes data from the Centers for Disease Control and from state health departments.
- *Abortions, reported* includes data from the Centers for Disease Control and from state health departments.
- *Abortions* includes estimates from Alan Guttmacher Institute surveys.
- *Abortions, merged* combines official reported data and Guttmacher figures with the compiler's estimates (provisional).
- *Fetal deaths* generally includes fetal deaths or stillbirths of at least 20 weeks' gestation.
- *Abortion ratio* is abortions per 1000 live births.
- *Abortion %* is abortions as percentage of pregnancies (excluding fetal deaths/miscarriages).
- *Abortion rate* is abortions per 1000 women ages 15-44.
- *Abortion %, merged* is abortions as percentage of pregnancies, using the *abortions, merged* figures (provisional).
- *Abortion rate, merged* is abortion per 1000 women ages 15-44, using the *abortions, merged* figures (provisional).

Ohio county level data also available: [abortions and live births](#) and [abortion percentages with state map](#).

		total in state	residents, in state only	residents, in and out of state	total in state	residents, in state only	residents, in and out of state	all in state		all in state	residents, in/out of state	all in state	residents, in/out of state		all i

Notes:

- For 2023, "AGI" and "merged" figures are for January-June while "reported" figures vary in partial year coverage.
- For most states, CDC/state data is incomplete.
- Parenthetical figures are estimates, some of which are derived from reported data.
- Abortion ratios, percentages, and rates may be based on a mix of CDC/state and AGI data and thus may not represent a consistent time series.
